## Tests

**The path to professionalism is paved with good choices. Take the right steps along that path.**

To help automotive professionals get the recognition they've earned for their expertise, ASE has offered its certification exams since 1972.

Today, we're much more than just certification tests. Here you'll find a gateway to other programs like practice tests, an EPA-authorized Section 609 program for refrigerant recovery and recycling, and student certification tests.

ASE offers a large variety of certification tests and other programs.
